OBJECTIVE

Seeking a position as a Full-Stack Developer in Toronto or GTA.

RELEVANT EXPERIENCE

- **Full-Stack Developer, Independent IT Consultancy** (Toronto-Canada, Jun 2016-Present)
 - Working on website, webapp, and chatbot projects for Canadian and Brazilian companies
 - Have worked in IT projects as volunteer
- **Front-End Developer, EatSleepRIDE Motorcycle GPS** (Toronto-Canada, Oct 2017-April 2018)
 - Developing and managing the website project by using React and Redux
 - Participating in an Agile environment
- **Back-End Developer, RANDSTAD BRASIL** (São Paulo-Brazil, Sep 2014-Aug 2015)
Second largest human resources company of the world.
 - Integrated two large systems resulting in the new official website
 - Used several APIs in legacy systems: BitAgency DOVA, Google, Catho, and Bullhorn
 - Worked with large volumes of data through importation, migration, and integration
 - Optimized queries in a critical financial data migration (increased 25% performance)
- **Co-Founder, BELLONI TECNOLOGIA** (São Paulo-Brazil, Jul 2013-Jun 2014)
Brazilian consulting company that supports and develops software.
 - Managed efforts and deadlines in a startup project
 - Presented projects to entrepreneurs, investors, and partners
 - Installed the solution at a big Brazilian company

- **Back-End Developer, CONECTA SERVIÇOS** (São Paulo-Brazil, Oct 2010-Jun 2013)
Software development company that develops products for insurance companies.
 - Developed APIs to support the front-end team
 - Participated in refactoring project of the whole ERP system
 - Meetings with stakeholders to understand project requirements
- **Front-End Developer, VALIDATA PAGAMENTOS** (São Paulo-Brazil, Jul 2009-Sep 2010)
A financial company that offers credit cards for low-income families.
 - Developed the customer profile website, online transaction monitor, and import/export viewer
 - Created tools for administrators based on business and marketing data
 - Wrote technical documentation and instructions
- **Project Manager, WINSDATA SISTEMAS** (São Paulo-Brazil, Sep 2007-Fev 2009)
A private company that manages digital documents through Content Management Systems.
 - Managed some projects by using UNISYS machines and its APIs
 - Presented products at a big business fair in São Paulo
- **Full-Stack Developer, GAIA TECHNOLOGIES** (São Paulo-Brazil, Jan 2003- Aug 2007)
Gaia Tech has an ERP solution that is deployed, configured, and used by many customers.
 - Contributed to EAI Team, customizing components and SAP integration
 - Supported the legacy ERP system at several customer's sites
 - Responsible for configuration management, documentation, and version control
 - Constructed automated tests and reports.

EDUCATION

- Course in **Solution Architecture**; FIAP (São Paulo-Brazil, 2012-2013)
